

# January

## IMPORTANT INDUSTRY & SECTOR APPLICABILITY QUALIFIERS:

\* = Widespread Industry Applicability (WIA)

\*\* = Isolated Sector Applicability (ISA)

January is National Birth Defects Prevention Month and National Radon Action Month.

January 1:

EPCRA (SARA Title III)—Suppliers must give notice to each company customer of affected mixtures or trade-name product containing toxic chemicals (listed at 40 CFR 372.65) with the first shipment of the calendar year.

Clean Water Act (CWA)—Facilities located in arid or extremely cold climates must plan how to meet the NPDES Storm Water Discharge quarterly monitoring requirements. Your plan to distribute the events during seasons when monitoring is possible must be documented in your Storm Water Pollution Prevention Plan (SWPPP) and be provided to EPA with your first monitoring report.

Recommendation for “Dangerous Goods” Regulations—Make sure you have a current volume of the International Air Transportation Association’s (IATA) Expanded Rail Car Identification and Road Trailer Identification charts;

? Added information about Globally Harmonized System of Classification and Labeling of Chemicals (GHS) markings

? Expanded Table of Placards

? Updated pipeline emergency response information

? Addition of all new dangerous goods/hazardous materials listed in UN

? Recommendations on the Transport of Dangerous Goods

Note: Vanguard receives no compensation for having made this recommendation.

OSHA—All employers covered by the Occupational Safety and Health Act, even those exempt from maintaining injury and illness records, are required to comply with OSHA’s new severe injury and illness reporting requirements—which took effect January 1, 2015. [Employers must notify OSHA within 8-hours of an employee being killed on the job, and notify OSHA within 24-hours of an employee having a work-related in-patient hospitalization, amputation, or loss of an eye.]

Clean Water Act (CWA) – From January 1 to March 31—Quarterly discharge monitoring reports for facilities permitted under EPA’s Multi-Sector General

	<p>Permit for Stormwater Discharges must be met at least once in this 3-month interval if monitoring is required quarterly.</p> <p>Reminder for facilities located in States under Federal OSHA jurisdiction: Make sure you're complying with the new recordkeeping and reporting requirements launched January 1, 2015</p> <p>Toxic Substances Control Act (TSCA): Exporters of certain toxic chemicals regulated under Sections 4 &amp; 5(b) must give notice to EPA with the first export of the calendar year.</p> <p>*Reminder on OSHA's Air Contaminant Exposure Limits – Compliance with certain permissible exposure limits (pels) applicable to grain-handling industries in SIC Codes 0723, 2041, 2044, 2046-8, 2075, 4221, &amp; 5153 may no longer be achieved through use of the methods specified in a Dec. 24, 1990 OSHA interpretation. See amendments under 29 CFR 1910.1000.</p> <p>U.S. DOT &amp; Clean Air Act – Submit biennial program evaluation report on enhanced inspection and maintenance programs, in odd-numbered years; for a state or local motor vehicle inspection and maintenance program authority.</p> <p>Reminder for Refrigeration Equipment Manufacturers – The introduction into interstate commerce or use of any Class II controlled substance other than HCFC-141b, HCFC-22, or HCFC-142b, is prohibited, except for use as a refrigerant in equipment manufactured before Jan. 1, 2020, and exports to Article 5 Parties. [CAA:</p>
January 3-9 :	National Folic Acid Awareness Week.
January 6 :	Reminder on RCRA Hazardous Waste. Fluorescent lamps has been added to universal waste list. Defines lamp as the bulb or tube portion of an electric lighting device, covers fluorescent, high-intensity discharge, neon, mercury vapor, high-pressure sodium, and metal halide lamps. All lamps not recycled will continue to be treated with the same disposal safeguards that apply to all hazardous wastes.
January 15:	For Onshore Natural Gas Wells, Compressor Facilities and Pneumatic Controller Facilities – Submit annual report regarding emissions of volatile organic compounds and sulfur dioxide.
January 21 :	Clean Air Act (CAAA) – Semiannual reports due from owners/operators of existing sources subject to organic hazardous air pollutants emission controls for equipment leaks from Group V chemical process units. See other semiannual report at July 21.

January 22:	Clean Air Act (CAAA) – Semiannual reports due from owners/operators of existing sources subject to organic hazardous air pollutants emission controls for equipment leaks from Group I chemical process units. See other semiannual report at July 22.
January 23:	<p>Clean Air Act (CAAA) – Semiannual reports due from owners/operators of existing sources subject to organic hazardous air pollutants emission controls for equipment leaks from Group III chemical process units. See other semiannual report at July 23.</p> <p>Clean Air Act (CAAA) – Semiannual reports due from owners/operators of existing sources with valves in gas/vapor service &amp; in light-liquid service that is subject to organic hazardous air pollutants emission controls for equipment leaks from Group II chemical process units and that elects to comply with alternative quality improvement plans must complete an analysis of valve data and conduct initial performance trials on such valves. See other semiannual report at July 23.</p>
January 24:	Clean Air Act (CAAA) – Semiannual reports due from owners/operators of existing sources subject to organic hazardous air pollutants emission controls for equipment leaks from Group IV chemical process units. See other semiannual report at July 24. quantity of material sent to them for reclamation, the mass of refrigerant reclaimed, and the mass of waste products.
January 30:	As specified in the facility's air permit, many Title V facilities and synthetic minor facilities are required to submit quarterly Operating or VOC Tracking reports. National Emissions Standards for Hazardous Air Pollutants (NESHAP) Semi-annual Compliance Report due for facilities who have completed their initial compliance period. Acid Rain - Submit a quarterly report electronically to EPA...for units subject to the continuous emission monitoring provisions of the acid rain program. For Those who order a controlled substance from a producer or importer: Submit a quarterly report to EPA...Applies to any person allocated an essential-use allowance. Refrigerant Reclamation – Submit annual report to EPA regarding the quantity of material sent to them for reclamation, the mass of refrigerant reclaimed, and the mass of waste products. Title V Operating Permits – Submit semiannual report of monitoring in regard to plantwide applicability limitation (PAL) For Portland Cement Plants – Submit semiannual excess emissions report for Portland cement plants that monitor visible emissions and that are subject to new source performance standards. Automobile or Light Duty Truck Coating Facilities – Submit semiannual report to EPA with for units using a continuous monitoring system; applies to facilities subject to new source performance standards.

## **Emissions Inventory Report (EIR) – March through June**

<http://www.aqmd.gov/home/regulations/compliance/annual-emission-reporting>

*NOTE: There are 35 total air districts in the State of California with different rules and deadlines unique to each region. With regard to the South Coast Air Quality Management District ( SCAQMD), if your completed report and applicable fees are received at the SCAQMD by the deadline, you may be subject to late payment surcharges, which would be calculated based on the original report submittal deadline of **March 3** as specified in Rule 301(e). **April 10** is the reporting deadline for facilities and suppliers of fuels and carbon dioxide, except when subject to abbreviated reporting (applies to electricity generation facilities, refineries, cement plants, facilities producing over 25,000 metric tons of CO<sub>2</sub>e from combustion sources, suppliers, and others.*

## **California's Safe Drinking Water Act (SDWA, aka Proposition 65)**

*Proposition 65 requires employer notification at all times alerting employees to any exposure to carcinogen, mutagens, and teratogens in the workplace. This regulates 730 chemical hazards known to cause cancer, cause genetic damage, and/or cause damage to the fetus of an unborn child, i.e., birth defects. Such hazards must be included as a part of occupational safety and health training for employees.*

## **Storm Water Runoff Permitting – July 15**

Submit electronically to Regional Water Quality Control Boards (i.e., Los Angeles – R4):  
[https://www.waterboards.ca.gov/water\\_issues/programs/stormwater/docs/stormwater\\_factsheet.pdf](https://www.waterboards.ca.gov/water_issues/programs/stormwater/docs/stormwater_factsheet.pdf)

*NOTE: California facilities must electronically submit an annual report to the Storm Water Multiple Application and Report Tracking System (SMARTS) Database by July 15 annually. The deadline for the Construction General Permit is September 1 annually. The annual fee for No Exposure Certification is \$150 with the deadline for recertification October 1 annually. Discharges from the 10 categories of industries are listed in the Federal Register (40 CFR 122.26) and the discharges from construction disturbances of 1 acre or more.*

**Qualified Industrial Stormwater Practitioner (QISP)** The California Stormwater Industrial General Permit (IGP) glossary defines a Qualified Industrial Stormwater Practitioner (QISP) as: “Only required once a Discharger reaches Level 1 status, a QISP is the individual assigned to ensure compliance with this General Permit or to assist New Dischargers with determining coverage eligibility for discharges to an impaired water body. A QISP’s responsibilities include implementing

the SWPPP, performing the Annual Comprehensive Facility Compliance Evaluation (Annual Evaluation), assisting in the preparation of Annual Reports, performing ERAs, and training appropriate Pollution Prevention Team members. The individual must take the appropriate State-approved or sponsored training to be qualified. Dischargers shall ensure that the designated QISP is geographically located in an area where they will be able to adequately perform the permit requirements at all of the facilities they represent.”
